Coimbatore, Tamilnadu (Open To Relocate)

Summary

Data Analyst with hands-on SQL, Python, and Power BI experience — cut reporting time 40% and automated risk-flagging across 5,000+ records in independent projects, with a track record of turning raw data into decisions.

Skills

Programming & Querying: SQL, Python

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

Data Analyst Intern

October 2025 – April 2026

Ai Variant (Remote)

Tools Used: Excel, SQL, Power BI

- Enabled leadership to track revenue, orders, customer, unit, profit, and margin KPIs by analyzing **54,771 client sales transactions** across 17,935 customers and 606 products.
- Standardized regional and product performance reporting by automating recurring Excel reports using **XLOOKUP, calculated fields, Pivot Tables, and Pivot Charts**.
- Improved reporting consistency across regions and products by collaborating with a 5-person analytics team and 1 senior manager to define and validate **6 KPIs**.

Projects

Movie Industry Data Analysis | *Python*

May 2026 – August 2026

- Analyzed movie industry data using **Python, Pandas, NumPy, Matplotlib, and Seaborn**, performing data cleaning, missing-value treatment, duplicate checks, and exploratory data analysis.
- Performed **Correlation analysis** across numerical and categorical features to evaluate relationships between budget, gross revenue, votes, ratings, runtime, and other movie attributes.
- Identified budget as the strongest variable associated with gross earnings (**0.74 correlation**), followed by audience votes with a **0.61 correlation**.
- Built scatter plots, regression plots, and correlation heatmaps to visualize revenue patterns and communicate key findings.

Insurance Data Analytics | *SQL, Power BI*

March 2026 – April 2026

- Segmented totals by age bucket, gender, and policy type by analyzing **5,000 insurance policies** across 3,148 customers using **10 SQL queries spanning 4 relational tables**.
- Identified renewal risk concentrated in Property policies—flagging **134 policies expiring in 2026**—through targeted SQL date-range filtering and analysis.
- Quantified **Rs. 251M+ in total claims** and identified a premium downturn following consistent growth by running SQL aggregation queries grouped by year.
- Revealed near-even claims and payment splits, with the 60+ age group as top policyholders, by building a **15-visual Power BI dashboard**.

Certifications

- Certificate of Excellence in Data Analytics — Excelr (2026):** SQL, Python, Excel, Power BI coursework, outstanding-performance distinction.
- Data Analyst Certificate, Cohort 3 — IIT Jammu (2026):** Statistical inference, regression, ML (Logistic Regression, Random Forest, Neural Networks, K-Means).
- NASSCOM FutureSkills Prime (2026):** Excel, SQL, Power BI, Tableau — MeitY-aligned assessment.

Education

B.E Computer Science and Technology

S.N.S College of Engineering, Coimbatore

Graduated: 2025

CGPA: 7.3/ 10
